Power Jet Egypt

For Integrated Petroleum Services
L.L.C

WHO WE ARE

We're a Leading Company In Advanced Technical Applications of Ultra High-Pressure Water Jet pumps technologies.

The Highest Safety Standards (PLC).

Power jet for integrated petroleum services is a leading company in the Field of oil and gas and Petroleum Services.

POWER JET EGYPT

For Integrated Petroleum Services

Scope of Work:-

Honor Our Company to introduce Our Activities as Following:

✚ Ultra High-Pressure Water Jet Pump technology.

- Water Jet Blasting.
- Well Cleaning.
- Heat Exchanger Cleaning
- Air Cooling Cleaning
- Storage Tank Cleaning
- Water Blasting techniques
- Tower Cleaning
- Vessel Cleaning and Water Blasting

✚ Hydrostatic Test (Application techniques).

✚ Water Jet Blasting.

✚ Sand Blasting – Painting.

✚ Tube Bundle Extractor.

✚ Heat Exchanger Re-tubing.

✚ Pigging.

✚ Flange Managements

POWER JET EGYPT
For Integrated Petroleum Services

Ultra High-Pressure Water Jet Pump

Ultra High Pressure Jet Pumps technology.

The Highest Safety Standards of a Digital Control System (PLC)

Ultra High Pressure Jet Pumps is characterized by its ease of movement between units and critical places because it's on wheels and isn't fixed on the ground and doesn't require a crane - winch ... etc.

There're Sensors In The Equipment's For UHPWJP

That Operate at Every Feature or Function,

The Sensors are All Powered by Electricity, Sound Alarms,

To Clarify & Show The Defect on The Machine's Screens.

Heat Exchanger Re-tubing

Heat Exchanger Re-tubing is a critical service that involves the replacement of worn, damaged, or corroded tubes in shell and tube heat exchangers or fin fan air coolers. Re-tubing can help to restore the performance of these heat transfer devices and extend their lifespan.

Pipe Line Pigging

Our company provides this service to remove debris, contaminants from the walls of the pipeline

Pipe line construction test according to standards and codes. Preventing accumulations that may hinder flow, lead to corrosion, reduce process efficiency and affect production.

The pig is cylindrical in shape or spherical to facilitate movement and good cleaning which can move inside the tube without stopping the flow.

Flange Managements

Use our flange management software to manage critical flanges with a strict guided maintenance protocol. Based on tool usage, tension & torque, and joint integrity calculation. we helps you manage flange integrity. It prevents leaks in flanges, which is the number one source of leaks in various asset-heavy industries. you can garante optimizing your costs and maintenance plan, as well as ensure proper practices for tension and torque
